INSIGHT360

Mobile interview capture

INSIGHT360

*Stay efficient and out-of-office with
INSIGHT360*

With INSIGHT360 mobile and tablet app, police officers can effortlessly record critical interviews directly from their mobile and tablet devices. This innovative app simplifies the entire process, from capturing high-quality audio and video to securely uploading evidence to central storage.

By eliminating paperwork and manual transcription, officers can focus on what truly matters: solving cases.

User-Friendly Interface: Our intuitive design facilitates effortless operation for officers of all technical backgrounds, minimizing training requirements and maximizing adoption.

Real-time Oversight and Support: Live-streaming enables supervisors or experts to monitor interviews in real-time, providing immediate guidance, corrections, or additional questions. This ensures consistency, accuracy, and adherence to best practices.

Always at Hand: Officers can access the INSIGHT360 on their personal or department-issued smartphones or tablets, eliminating the need to carry additional hardware.

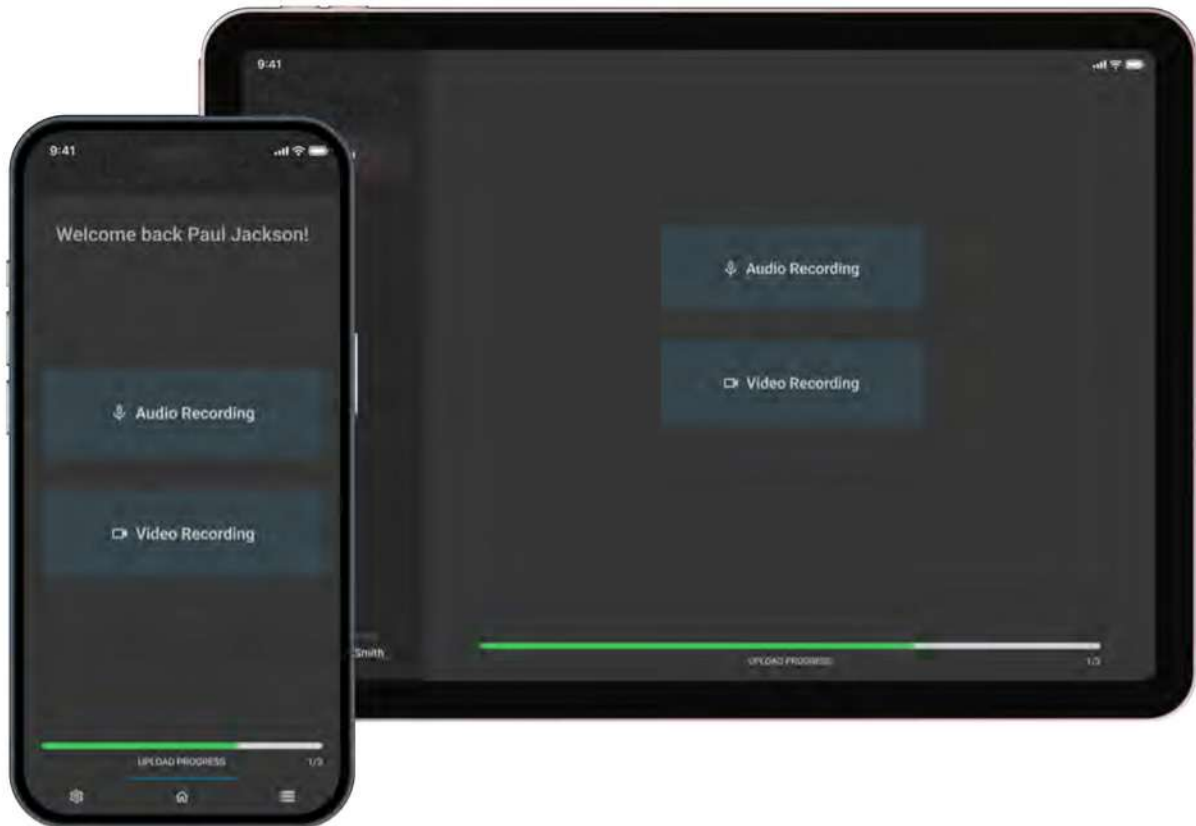

Lower Initial Costs: Deploying INSIGHT360 (app) represent a lower upfront investment cost and a more rapid deployment compared to dedicated devices.
